

## Job Opening: Software Developer (Intern)

### About us:

We are an early-stage cyber security startup that is changing the way people authenticate themselves by creating a distributed authentication ecosystem that is both more secure and easier to use (even fun).

Allthenticate enables users to authenticate with *everything* (e.g., physical doors, laptops, and websites) using their smartphones in a seamless way. Our patented architecture consists of a portable security module, which can be purely software or leverage hardware-based security mechanisms, that provides secure and flexible interactions with any resource. Moreover, Allthenticate offers an easy-to-use cloud-based interface for company administrators to manage all of their employees, digital resources, and physical access control in a single interface, with aggregated, comprehensive logs. We are confident that with our expertise, and your help, we can create a better tomorrow -- one without passwords, keys, hardware tokens, or authentication-based security breaches.

### The position:

We are looking for interns to join us in our office located in beautiful and sunny Santa Barbara. Our ideal candidate needs to be eager to gain experience and willing to learn the best engineering practices and contribute production level code during the internship.

### Roles and responsibilities:

- Participate in design and code reviews
- Build, or help build, the iOS App and Android Apps
- Help identify ways to improve and diagnose back-end bugs
- Work closely with other engineers on a small development team to launch features
- Learn how to write small features and deploy them often (continuous delivery)
- Write unit tests and assist in finding and squashing bugs
- Performs various other duties as needed

### Hours per week:

- 20-40 hours per week

### Requirements

- Pursuing or completed a Bachelor's or Master's Degree Program with a focus on programming (Computer Science or related fields)
- Ability to write high-performance Java, C++, Swift, Objective C, Javascript or Python code
- A creative problem solver and attentive to detail

## Good to have:

- Experience or knowledge in building iOS and Android Apps
- Experience with interactive web development

## Internship Compensation:

- College Credit
- Pay

## Benefits:

20-40 hours/week. Times have some flexibility dependent on chosen schedule. We will provide any documentation for the student to receive school credit. Financial compensation will be determined based on qualifications.

- Working and collaborating directly with founders.
- Completing tangible projects to showcase on your resume.
- Opportunity to join a growing team full-time.
- Work with a fun, inclusive, smart team of people as we build a Santa Barbara-based cyber security company
- Mentorship opportunities from experienced engineers
- Great company culture that include fun team dinners, soccer games or volleyball games
- Priceless opportunity to work at an early age startup, gain experience building a startup from the ground level and learn what it takes to make the company grow
- Access to founders who will help you network to future internships, jobs or graduate programs.
- Potential for full time employment with an equity stake in the company.

## Company Culture:

At Allthenticate, our culture is our soul and we want to make sure our employees walk into work with a smile on their faces, that is why we can be described as:

- Detail-oriented -- quality and precision-focused
- Outcome-oriented -- results-focused with strong performance culture
- Innovative -- innovative and risk-taking
- Team-oriented -- cooperative and collaborative

We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status
